

EXHIBIT I

KDHE APPROVED SWPPP

The Applicant met with representatives from the Douglas County Public Works Department and Zoning & Codes on April 24, 2023 to discuss stormwater engineering design standards for the Project. During this meeting the applicant proposed a KDHE approved SWPPP be provided prior to building permit release as it is typical to submit a SWPPP for agency review closer to construction when engineering design is more advanced. Representatives from both departments were in agreement with this proposal. The Applicant requests the requirement of a copy of the KDHE approved SWPPP for the site be a condition to be met prior to issuance of building permits.
